RN Content Mastery Series® 2019 Proctored
Leadership – Test Description

Educators can include the following information in student communications to assist students in their learning. However, you should not share topic descriptors with students, as that would pose a breach in security and would limit students' focus of inquiry.

This 70-item test offers an assessment of basic comprehension and mastery of leadership and management principles. This assessment emphasizes decision-making skills with regard to managing and prioritizing care. Principles include:

- Client and staff advocacy (advance directives, client rights, information technology, ethical practice, informed consent, legal rights and responsibilities)
- Provider of client care (resource management, safe use of equipment, handling infectious and hazardous materials, injury prevention, security plans, reporting incidents, priority setting)
- Supervisor of client care (assigning, delegating and supervising, conflict resolution, staff development and performance improvement, time management)
- Collaborator/planner of client care (disaster and emergency management, collaboration with interprofessional team, continuity of care, case management, discharge planning)

You have 70 minutes to complete the assessment.
