

# 3 ideas to ensure Engage Series success

After implementing Engage into her Fundamentals course — and given the option of other sources including a textbook — Dr. B said Engage Fundamentals was the resource students used (and enjoyed) the most. To duplicate her success, follow these suggestions:

## 1) Use Engage to guide your class syllabus.

- When approaching new content, direct students to review Engage resources first.
- Use Engage videos and content pieces as your primary resource.

## 2) Keep your textbook (at least initially) and use it as a supplementary reference.

- Doing so provides comfort for many students, even though most don't open or read the textbook.
- Supplement with ATI Review Modules as another reference. Students like the bulleted/summary style.
- Remind students who are doing poorly that the textbook is available. This prompt will eliminate the excuse that "there were no resources."

## 3) Encourage students to repeatedly use their Engage materials. (She tells students to "see things 5 times" to ensure the learning sinks in.)
