

Strategies

to use in clinical

Activity: Change-of-shift report

Create an end-of-shift report that incorporates information related to the steps of the Nursing Process.

- *Recognize cues (assessment):* Summarize important information from the change-of-shift report.
- *Generate hypotheses (analysis):* Identify client problems/needs.
- *Planning (judge hypotheses):* Select a priority-setting framework and prioritize the client problems/needs.
- *Implementing (take action):* Identify priority nursing actions.
- *Evaluate outcomes (evaluation):* Recognize client response to nursing actions.

Repeat the activity using a different priority-setting framework and compare:

- Priority problems/needs
- Priority nursing actions
- Client response to nursing actions.

DISCUSSION

- 1) Identify client problems.
- 2) Select a priority setting framework and prioritize the client problems/needs.
- 3) Identify priority nursing actions.
- 4) Recognize client response to nursing actions.

See client example on next page.
