

HOW TO CHOOSE A NURSING EDUCATION SUPPLIER: 4 FUNDAMENTALS

Before comparing different products or solutions, examine whether a company:

1

Offers a single platform for accessing products and resources — one username, one password

2

Provides recorded, virtual, and in-person training and support for their products

3

Provides detailed, prescriptive guidance on solution and curriculum alignment

4

Develops their reporting and predictive analytics from a large pool of nursing students.
